* The United Nations secretariat = demographic and social statistics unit.

* All African Countries and Governments who made informations available to the UN

*All NGO's, individuals and organizations that supported the UN in their varius capacities.

Margin of error: limited

These estimates and projections are based on national census or survey data that have been evaluated and, whenever necessary, adjusted for deficiencies and inconcicencies.

Urban – rural classification of population in internationally published statistics follows the national census definition, which differs from one country to another. National definitions are usually based on criteria that may include any of the following: size of population in locality, population density, distance between built-up areas, predominant type of economic activity, legal or administrative boundaries and urban characteristics such as specific services and facilities.
